

Alliance Program Annual “Snapshot” Report

October 1, 2024, to September 30, 2025

Executive Summary

[Alliances](#) are established by OSHA’s National, Regional, and Area Offices. In Fiscal Year (FY) 2025, OSHA worked with 305 Alliances, including 39 National Alliances and 266 Regional and Area Office Alliances.

In FY 2025, National Alliance Program participants, not including Ambassadors:¹

- Conducted more than 340 activities to disseminate information about OSHA’s safety and health initiatives and resources, reaching more than 1,637,000 .²
- Conducted more than 550 public events and training activities, reaching more than 100,000.

In addition, Alliance Program Ambassadors provided four training events for more than 50 representatives from federal OSHA, state OSHA agencies, and On-Site Consultation programs.

Regional and Area Office Alliance Program participants involved OSHA staff in more than 800 outreach and training activities, reaching more than 65,000 people.

Alliance Program Participants

The Alliance Program is open to all groups that are committed to workplace safety and health, including trade and professional organizations, labor organizations, businesses, educational institutions, and other government agencies. [Alliances](#) are established by OSHA’s National, Regional, and Area Offices. In FY 2025, OSHA worked with 305 Alliances, including 39 National Alliances and 266 Regional and Area Office Alliances. During FY 2025, OSHA signed 20 new Alliances and concluded eleven. OSHA also renewed 33 Alliances and promoted eight long-time Alliances to Alliance Program Ambassador status. Please refer to the charts located [here](#) for program participation, signatories, and emphasis areas.

Alliance Program Impact in FY 2025

National Office Alliance Program Participants

In FY 2025, OSHA’s national Alliance participants, not including Ambassadors, conducted more than 345 activities to disseminate information about safety and health initiatives, and resources from OSHA and other organizations, reaching 1,637,410. These data are self-reported by National Alliance participants as a “fundamental requirement” of the program; Alliance Ambassadors are not required to share data with the agency.

¹ More than half (26) of OSHA’s 39 National Alliance Program participants are Alliance Program Ambassadors—long time program participants who have demonstrated their commitment to continued collaborations with OSHA. These organizations also conduct significant outreach and training on workplace safety; however, they are no longer required to provide OSHA with data regarding the number and reach of their activities.

² Note that this figure does not represent 1,637,000 different people. Multiple dissemination activities by an Alliance participant may reach the same group of people. For example, a particular Alliance may send two email blasts on different topics to its 500 stakeholders, which accounts for 1,000 people reached in our calculation.

Alliance Program Annual “Snapshot” Report

October 1, 2024, to September 30, 2025

The following chart shows national participant dissemination activities by OSHA’s areas of emphasis.

OSHA Emphasis Area	Number of Dissemination Activities	Number Reached
Agriculture	12	56,457
Construction	89	791,873
Electrical	8	40,660
Emergency Preparedness and Response	6	27,550
Fall Prevention	20	390,284
Hazard Communication/ Chemicals	8	27,522
Health Care	8	3,750
Heat Illness Prevention	24	120,707
Inspections / Penalties	12	124,438
Safety and Health Programs	85	288,688
Safe + Sound	30	208,207
Small Business	3	20,800
Suicide Prevention / Mental Health	33	69,472
Trenching	79	319,921
Young Workers	3	5,610

National Alliance participants also conducted 559 events and training activities for the public in FY 2025, reaching 109,322. In addition, Alliance Program Ambassadors conducted four trainings for 56 federal OSHA, state OSHA, and On-Site Consultation program representatives in FY 2025.

Finally, in FY 2025, the following outreach materials were developed by national alliances:

- The National Demolition Association (NDA), developed [guidelines](#) for employers onboarding new demolition industry employees.
- The Elevator Industry Safety Partners developed a [New Hire Orientation Training Instructor Guide and training resources on 24 topics](#).

Alliance Program Annual “Snapshot” Report

October 1, 2024, to September 30, 2025

- The Society for Chemical Hazard Communication (SCHC) updated fact sheets on classifying and labeling [Acute Dermal Toxicity](#), [Respiratory Sensitization](#) and [Carcinogenicity](#) in OSHA’s Hazard Communication Standard (29 CFR 1910.1200).
- The Roadway Work Zone Safety and Health Partners developed an infographic, [Worker Fatalities at Road Construction Sites](#), and a brochure on [Internal Traffic Control Plans](#).

In addition, the American Staffing Association, another Alliance Program Ambassador, contributed substantial expertise to the development of new OSHA resources produced through the Temporary Worker Initiative, including Frequently Asked Questions (FAQs) and a [Construction Employment Bulletin](#). The Partners for Safe Trenching and Excavation Operations also collaborated with OSHA to develop drop-in articles promoting awareness of National Safe Digging Month and the Safe + Sound Campaign.

Please see the [Alliance Program Participant-Developed Products](#) page for a full list of available resources.

Regional and Area Office Alliance Program Participants

In FY 2025, OSHA field staff were involved in 862 Regional and Area Office Alliance participant outreach activities, which directly reached 67,170. These data are gathered and recorded by the OSHA field staff participating in the activities.

The following table shows the number of Regional and Area Office participant activities in FY 2025, and the number of people reached by these activities.³

Region	Number of Alliances	Number of Tasks	Number Reached ±
ATL	33	88	3,833
BHM	15	9	671
BOS	33	93	8,358
CHI	25	38	2,117
DAL	56	211	11,051
DEN	36	58	4,611
KCM	17	63	10,236
NYC	11	16	803
PHI	29	220	14,150
SFO	11	65	11,318
Total	266	862	67,170

³ The numbers include only those Alliance activities in which an OSHA staff person was involved and reported in the OSHA Information System (OIS). There is a small percentage of Regional and Area Office Alliance activities that do not involve an OSHA staff person and are not reflected in these numbers.

Alliance Program Annual “Snapshot” Report

October 1, 2024, to September 30, 2025

± “Number Reached” refers to the number of individuals directly targeted by the outreach activity (e.g., number of people on an email distribution list for email alerts or newsletter distribution; audience for a radio/tv interview). The number of individuals subsequently affected by these outreach activities is likely significantly greater.

The following table shows the number of Regional and Area Office Alliance activities broken out by OSHA areas of emphasis.

Region	Number of Alliances	Total Tasks*	Construction	Fall Stand-Down	Hazard Communication	Heat Illness Prevention	Inspections/ Penalties	Powered Industrial Trucks	Recordkeeping/ Reporting	Safety and Health Programs	Small Business	Trenching	Youth
ATL	33	88	25	1	-	7	10	-	2	12	27	12	5
BHM	15	9	5	1	3	4	3	1	2	6	4	3	1
BOS	33	93	36	1	18	18	17	3	9	16	52	7	9
CHI	25	38	14	1	7	13	6	6	6	18	17	9	8
DAL	56	211	107	14	51	71	51	24	46	61	83	68	8
DEN	36	58	27	4	14	7	9	17	8	32	37	20	4
KCM	17	63	36	5	11	28	20	14	14	27	36	24	12
NYC	11	16	14	2	2	4	2	1		1	1	3	1
PHI	29	220	131	6	49	65	100	45	68	92	102	45	69
SFO	11	65	14	2	2	8	2	-	2	26	6	2	6
Total	266	862	410	37	157	225	220	111	157	292	365	193	123

* A single activity may cover more than one area of emphasis, and therefore may be counted in more than one area of emphasis column.

Looking Ahead to FY 2026

In FY 2026, OSHA will continue outreach, information sharing, and training in partnership with Alliance Program participants. The program will seek to build new stakeholder relationships to expand the reach and impact of its messaging, particularly to small businesses and new small business owners. In addition, OSHA and its Alliance Program participants will collaborate in identifying opportunities to participate in meetings, conferences, roundtables, and other events to promote workplace hazard awareness and robust workplace safety and health programs. The program will also seek to raise awareness of opportunities to collaborate or seek assistance from OSHA, including through its other cooperative programs.
